

For this assignment I have dived deep into the mists of the Canva AI Pro image generator tool. My prompt was: majestic dragon creature with rainbow-colored scales, large white wings, and golden horns.

I was actually pretty happy with the results. The one I'm going to keep working on is in the top right corner:

But as you can see it misses a leg. So, I remixed the selected image and I got this:

This dragon looks younger and a bit less 'majestic'. Also, the leg problem isn't completely solved because now we have 5 of those. So, I've remixed the first image once again:

Now we have 4 legs and an elderly drake but a bit scarier than majestic. I rerolled the current image this time:

But I still feel like something is missing. The images keep getting less and less detailed, so I just regenerated the prompt and remixed over and over until it resulted me in this beauty:
